

▶ Lean Practitioner Certification

The course is intended to provide insight into the principles of Lean and help business leaders and Improvement practitioners decide on the way forward towards adoption of these powerful methodologies.

The participants will also be able to see various roles which need to be played within the organization for successful deployment of these initiatives. These roles are also very critical for long term sustenance of the initiatives.

We will also showcase case studies of successful application of Lean in different business environments.

The contents for the 5 day Lean Practitioner session would be as follows:

- Lean Overview and Fundamentals
- Value & 8 forms of waste (With in-class simulation)
- Enterprise-wide Value Stream Assessment
- Value Stream Mapping (Current / Future)
- 5S, Visual management & Flow Principles
- Pull & Kanban
- Resource Reliability Enhancement
- Mistake Proofing
- SCORE™ & Lean Deployment Roadmap
- Change Management

Lean – Trimming waste, maximizing margins

Lean is a set of methods companies can apply to any manufacturing, transactional or service process to reduce waste, eliminate non-value-added actions and cut time, thereby improving the flow of processes.

Lean methods have a rich and proven history that began in the automobile industry at Ford in the 1920s in a rudimentary way and at Toyota in the 1950s in a more advanced way. Lean can bring in both short-term results and long-term change through the power of Total Employee Involvement. It is for this reason many companies are embracing Lean.

KEY LEARNING OUTCOMES

On completion of this course, participants will be able to:

- Understand basic concepts of Lean
- Understand specific areas in the organization which can benefit from Lean
- Identify various Performance Excellence roles and their responsibilities for a successful deployment of Lean
- Get an insight into the deployment roadmap and the next steps to be taken
- See practical application of Lean in real business issues

AT A GLANCE

Duration:

5 Days (Consecutive)

Who Should Attend:

- Change Agents
- Process Experts
- Improvement Practitioners
- Support Function Experts
- Engineers
- Managers

Pre Course suggested Readings

- Machine that Changed the World
- Learning to see
- Lean Solutions

About BMGI?

Breakthrough Management Group International (BMGI), a global consulting firm, partners organizations to transform their business performance with a strong focus on delivering results. Today, BMGI is recognized as the world leader in harnessing the power of cutting edge techniques in the area of **Innovation, Strategy, Problem Solving** and **Business Transformation** for achieving tangible business results.

Headquartered in the US, BMGI has developed a loyal clientele across the globe. BMGI has partnered with organizations in various stages of their business life cycles and has delivered cumulative benefits of several billion dollars to its clients with an **ROI of 5:1 to 20:1**. In India, BMGI is located in Mumbai.

Why BMGI?

BMGI has provided training to thousands of professionals across diverse sectors, empowering esteemed corporations in India and around the globe. BMGI's Green Belt certification sets the standard for excellence in professional development, trusted by top-tier companies worldwide to drive innovation and operational success.
